Professional Summary

Highly motivated and results-oriented Software Engineer with a proven track record of designing, developing, and implementing innovative software solutions. Possesses a strong academic background in Computer Science and hands-on experience in full-stack development. Eager to contribute technical expertise and collaborative spirit to a dynamic team, driving the creation of impactful products.

Education

University of Science

Computer Science | Minor: Mathematics

Aug 2018 – May 2022

New York, NY

Relevant Experience

Google

Software Engineer Intern

Jun 2021 – Aug 2021

Mountain View, CA

- Designed, developed, and tested backend services for a new product feature using Go and gRPC, resulting in a 20% improvement in response times.
- Collaborated with cross-functional teams, including product managers and designers, to gather requirements and implement solutions.
- Participated in code reviews and provided constructive feedback to ensure code quality and maintainability.
- Gained valuable experience in Agile development methodologies and software engineering best practices.

XYZ Startup

Full-Stack Developer

Sep 2022 – Present

New York, NY

- Led the development of a new web application from concept to deployment, utilizing React for the frontend and Node.js for the backend.
- Implemented RESTful APIs to enable seamless communication between frontend and backend components.
- Optimized database queries and application performance, leading to a 30% reduction in page load times.
- Mentored junior developers and fostered a collaborative team environment.

Projects

Resume Builder – Go, LaTeX

- A tool to generate professional resumes from JSON data using LaTeX templates. Provides customization options and supports multiple output formats (PDF, TXT).

Personal Portfolio Website – React, HTML, CSS, JavaScript

- A responsive website showcasing my projects, skills, and experience. Built with React, HTML, CSS, and JavaScript.

Machine Learning-Powered Chatbot – Python, TensorFlow, Natural Language Processing (NLP)

- Developed a chatbot using natural language processing (NLP) and machine learning techniques to provide automated customer support and answer frequently asked questions. Trained the model on a large dataset of customer interactions to improve accuracy and responsiveness.

Skills

Programming Languages: Go, Python, Java, JavaScript, TypeScript

Frontend Development: React, HTML, CSS, JavaScript

Backend Development: Node.js, Express, gRPC, REST APIs

Databases: MySQL, PostgreSQL, MongoDB

Cloud Platforms: AWS, Google Cloud Platform

Tools & Technologies: Git, Docker, Kubernetes, Agile

Certifications

AWS Certified Solutions Architect – Associate – Amazon Web Services

Jan 2023 – Jan 2026

Languages

Proficiency in multiple languages

- English (Fluent)
- Spanish (Conversational)
